Check for MetroCluster configuration errors 1

Check for MetroCluster configuration errors

You can use the Config Advisor tool available from the NetApp Support Site to check for common configuration errors.

About this task

Config Advisor is a configuration validation and health check tool. You can deploy it at both secure sites and non-secure sites for data collection and system analysis.

Support for Config Advisor is limited, and available only online.

1. Download the [Active IQ Config Advisor](#) tool.
2. Run Active IQ Config Advisor, reviewing the output and following its recommendations to address any issues.
